

## ***Tinker Inflatables***

After 36 years of continuous production of the Tinker range of inflatables, Henshaw Inflatables have taken the decision to discontinue production. During these last 36 years more than 10,000 Tinkers have been built by hand exclusively in Wincanton.

It has become very apparent that it is no longer economically viable to continue production and we are not prepared to compromise on materials and quality to try and reduce costs.

**Servicing of existing Tinkers will still be available through Scott Braye at RIB Repair, Setley Vineyard, Lymington Road, Setley, Brockenhurst, SO42 7UF Tel: 01590 624738 or Mobile 07802 667320**

Henshaw Inflatables continues to go from strength to strength with more than 50 employees building inflatable tubes for the RIB market, fendering systems for the Super Yacht market and various other marine related products.

Please contact [Henshaw Inflatables](#) with any questions concerning Tinkers.
